DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings, specifically figure 3, filed on 28 January 2004 are informal and are suitable for examination purposes only. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-19 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest one or more of the limitations found in independent claims 1 and 16-19. Lee et al. '471, Zhang et al. '835, Barbee et al. '124, Heinz et al. '289, and Dougherty et al. '478 all teach detection or alignment systems utilizing second order light. However, with respect to independent claims 1 and 16, the prior art of record fails to teach or suggest the combination of a laser, a non-linear optical crystal creating second order light, a beam expander in the beam path after the non-linear crystal, a dichromatic mirror in the beam path after the beam

Art Unit: 2821

expander, and a partial reflector of the second order light in the transmission path after the dichromatic mirror. With respect to independent claim 17, the prior art of record fails to teach or suggest the steps of focusing the second order light beam on a sample while blocking the fundamental beam from the sample, and providing for the fundamental beam to impact the sample at the point of focus of the second order light beam. With respect to independent claim 18, the prior art of record fails to teach or suggest the steps of focusing the second order light beam on a detector at a predetermined pixel, and determining deviation of the second order light from the predetermined pixel for determining the state of calibration. With respect to independent claim 19, the prior art of record fails to teach or suggest the steps of focusing the second and third order light beams on a detector at predetermined pixels, and determining the amount of deviation of the second order light from its predetermined pixel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
